Project Topic and Brief Description

❖ Topic Name: **Sunzra**(Music Website)

❖ Brief Description:

Our project is based on a music website named SUNZRA. In our project there are songs with fully functional music players so, anyone can easily listen to the songs and control the song volume, forward song, preview song, etc. In this project, there are two types of language sections of songs i.e. Hindi Songs and English Songs also in our project there is a home page and a contact us section in which anyone can send queries or suggestions through a form stored in a database at the server end. That's all about our project in brief.

ThankYou... Hopefully, you like it.
